

CHANGE IN PROCEDURE FOR FILLING OUT THE HEATER

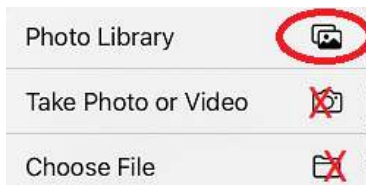

ACTIVITY REPORT NOT COVERED IN VIDEO OR FOLDER

The procedure used to verify your photo is **now a TWO STEP PROCESS**. A new button called “Choose File has been added. It is above the Upload Photo button as shown below. After taking

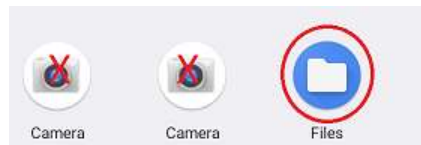

a picture with your camera, touch the “Choose File” button. You will see the options that you had seen when you touched the Upload Photo button.

IF YOU ARE USING AN iPhone OR OLDER MODEL ANDROID PHONE, select the right photo library icon (iPhone) or the media picker or File icon (Android) as you have been doing and select the photo you just took from your photos

iPhone

Android

IF YOU ARE USING A NEWER MODEL ANDROID that has regular updates, the procedure has changed. You will select the left most camera icon – it is circled in red in fig below.

Your camera will open and you will take a second picture of the setup.

Under either scenario, you will see a thumbnail sized photo and the name of the file once you have chosen a file - the words “No File Chosen” will disappear.

When you are ready to upload the file, touch the Upload button. As before, you are free to upload the photo any time. Again, uploading in the building can be a challenge due to an inconsistent Wi-Fi signal and the blocking of cellular signals. Thus, the recommendation is to do the upload immediately after you exit the building. Alternatively, you can do the upload at home, at work, or any place that has a consistent, strong Wi-Fi signal.
